MEET
the
PROJECT TEAM

At **Knapp Engineering**, we pride ourselves on our expertise, dedication and experience that each team member delivers. From the start of a bid to the completion of a project, our Project Team ensures all phases are met with precision, efficiency, and excellence. The project management process manifests with our skilled bidding team, which includes:

>>> **Gregg Knapp, President** – With decades of industry experience, Gregg leads the bidding process with strategic insights, technical prowess, and a keen eye for detail.

>>> **Chris Knapp, Vice President** – A key contributor to our bidding team, Chris brings a wealth of knowledge and an analytical approach to project assessment and engineering solutions.

>>> **Octavia Plesnik, Project Estimator** – Octavia supports the team and all bidding functions with her strong organizational skills, ensuring that each bid aligns with our client's needs and expectations.

Together, they work tirelessly to secure the best opportunities and materials for our clients, ensuring a seamless transition from the bidding phase to project execution.

Once a project is secured, **Zach Esterman, our Project Manager**, steps in to guide the project through every phase. With Zach at the helm, our clients can trust that their project will be managed with meticulous care and timely delivery.

Assisting Zach is **Allison Calca, our Project Coordinator**, who works closely with both customers and vendors to keep communication clear and operations running smoothly.

The strength of our Project Team lies in its collaborative approach and cohesion. We ensure that every project benefits from the collective expertise and dedication of our entire team. Whether it is negotiating with vendors, managing timelines, or maintaining strong customer communication, our team is committed to making each project a success.

At Knapp Engineering, we understand the importance of an effective Project Team and strive to provide the best service possible from start to finish. Our seamless integration of bidding, project management, and coordination ensures that every project we undertake is executed flawlessly.
